The Region's Newest Choice
for Older Adults

Personal Care Comes to Phoebe Richland

Meadow Glen is a new 75,000-square-foot, two-story personal care facility featuring 72 studio and one-bedroom apartments.

Personal care is the perfect option for older adults who wish to live independently, but need assistance for activities of daily living such as bathing, dressing, and taking medication. Many people think of this as assisted living.

Meadow Glen at Phoebe Richland meets a growing need in Upper Bucks County for older adults seeking traditional personal care or personal care with memory support services.

A Unique Design

Phoebe worked with industry-leading professionals to create a cutting-edge model that will meet the current and future needs of Phoebe's residents and the community. This new building affords the region's older adults innovative care and services close to home.

Three of four wings are dedicated to providing assistive care as needed to help residents maintain independence.

One neighborhood is solely dedicated to serving residents in need of specialized memory support along with personal care. The opposite first floor can easily convert in the event that the community's need for memory support services grows in the future.
